

## Herd Immunity Scenario: Student Worksheet

Day	25%		50%		75%	
1						
2						
3						
4						
5						
6						
7						

Use this sheet to record your observations after each stage of the scenario. Then add your conclusions.

As more people get vaccinated, what happens to the spread of the infection?

---

---

---

---

---

Draw a graph to illustrate the results.

### Conclusions

What is herd immunity?

---

What happens when vaccination drops to a low level within the community?

---

Why is a vaccine regarded as a preventative measure and not a treatment?
